SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics,
Report FT 120, January, 1961. Washington 25, D. C.
April, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES INCLUDED IN THIS REPORT

URANIUM, THORIUM, AND RELATED COMMODITIES NO LONGER EXCLUDED FROM IMPORT DATA

Effective with the January 1961 statistics, imports of uranium, thorium, heavy water, and certain imports of nickel from the United Kingdom are being included in the regularly compiled import statistics. These items were previously completely excluded from the import statistics for security reasons, but permission has now been received from the security authorities to include them. (Announcement of the exclusion of these items was made in the July 1948 issue of the Foreign Trade Statistics Notes (page 212) and in a public notice entitled "Revision of Security Regulations for the Release of Foreign Trade Data," dated September 14, 1945.)

For imports of uranium, the statistics include complete commodity by country by Customs district data on a current basis beginning with January 1961. It is also planned to release at a later date complete commodity by country by Customs district data for the period July-December 1960. For periods prior to July 1960, however, complete commodity by country by Customs district information on uranium is to be released for only the following countries of origin: Canada, Belgian Congo (now the Republic of the Congo), Union of South Africa, and Sweden. Imports of uranium from any other countries during this earlier period will not be identified by individual country but will be summarized under an arbitrary country code 998 as "unidentified countries."

For imports of thorium, data in complete commodity by country by Customs district detail is authorized to be shown for the following countries of origin only: Canada, United Kingdom, West Germany, Republic of Korea, Malaya, and the Union of South Africa. For both current and past periods, imports from any other countries will not be identified by individual country but will be summarized under an arbitrary country code 998 as "unidentified countries."

For imports of heavy water and for certain imports of nickel from the United Kingdom, data in complete commodity by country by Customs district detail are being reflected on a current basis effective with the January 1961 statistics; it is also planned to release data for past periods in complete commodity by country by Customs district detail at a later date.

Additional information regarding the method of releasing the data for periods prior to January 1961 will be described in a future issue of this report.

Following are the import commodity classifications under which the affected items will be included and the effective date on which the information was withheld.

Schedule A Commodity Number	Schedule A Commodity Description	Effective date information withheld
	Uranium ores, concentrates, compounds salts, metals and alloys:	
6270 700	Uranium ore	January 1943
6250 420	Ferrouranium	July 1945
8380 035	Uranium, oxide and salts of	July 1945
6250 650	Uranium metal (formerly part of 6250 640)	July 1945
	Alloys of two or more of the metals specified in 6250 590, 6250 600, 6250 610, 6250 620, 6250 630, 6250 650, and 6250 655:	
6250 660	If containing columbium or niobium, or tantalum or both as specified in 6250 600 and 6250 610 (formerly part of 6250 670)	July 1945
6250 680	Other as specified in 6250 590, 6250 620, 6250 630, 6250 650, and 6250 655 (formerly part of 6250 640).	July 1945
	Alloys, n.s.p.f., of one or more of the metals specified in 6250 590, 6250 600, 6250 610, 6250 620, 6250 630, 6250 650, 6250 655 with one or more of the metals aluminum, chromium, cobalt, copper, manganese, nickel, or silicon:	
6250 695	Of titanium (formerly part of 6250 690)	July 1945
6250 699	Other (formerly part of 6250 690)	July 1945
	Thorium ores, concentrates, compounds salts, metals and alloys:	
5930 300	Monazite sand and other thorium ore	July 1945
8380 922	Thorium nitrate, thorium oxide (thoria), and other salts, n.s.p.f., and gas-mantle scrap	July 1945
6250 655	Barium, boron, strontium, thorium, and vanadium metal (formerly part of 6250 640)	July 1945
	(Also see 6250 660, 6250 680, 6250 695, and 6250 699)	July 1945
	Heavy water:	
8380 950	Chemical elements, compounds, mixtures, and salts, n.s.p.f., not containing alcohol, other, n.e.s. (include wood impregnating materials containing salts of arsenic or salts of chromium or both)	January 1948
	Certain nickel products from the United Kingdom:	
6542 000	Nickel and alloys, nickel chief value, pigs, ingots, shot, cubes, grains, cathodes, or similar forms (include scrap).	January 1950

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[1] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

[1] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports will be included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,111,715,106
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		65,935,359
010	Animals, edible (except for breeding)	0010600-0015500	7,561,865
020	Meat products	0018300-0035500	25,807,364
030	Animal oils and fats, edible	0036000-0036900	756,055
040	Dairy products	0037000-0046990	3,291,633
050	Fish and fish products, except shellfish	0047000-0079590	16,314,104
060	Shellfish and products	0080100-0087900	11,056,387
070	Other edible animal products	0088100-0097900	1,147,951
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		33,970,439
080	Hides and skins, raw (except furs)	0201000-0299900	4,423,432
090	Leather	0301400-0345900	3,362,932
100	Leather, rawhide, and parchment manufactures	0350300-0699990	6,373,645
110	Furs and manufactures	0701000-0759900	12,859,174
121	Animal and fish oils, fats, and greases, inedible	0803000-0821600	387,742
130	Other inedible animals and animal products	0840000-0990290	6,563,514
	GROUP 1—VEGETABLE FOOD PRODUCTS AND BEVERAGES		193,738,960

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, February, 1961. Washington 25, D. C. April, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[1] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

[1] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports will be included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics,
Report FT 120, March, 1961. Washington 25, D. C.
June, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[1] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

[1] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports will be included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census. United States Import Statistics, Report FT 120, April, 1961. Washington 25, D. C. June, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[1] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

[1] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports will be included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,045,672,776
	GROUP 00—ANIMALS AND ANIMAL PRODUCTS, EDIBLE		62,188,944
010	Animals, edible (except for breeding)	0010600-0015500	5,222,372
020	Meat products	0018300-0035500	32,548,280
030	Animal oils and fats, edible	0036000-0036900	16,352
040	Dairy products	0037000-0046990	2,981,736
050	Fish and fish products, except shellfish	0047000-0079590	11,961,705
060	Shellfish and products	0080100-0087900	8,885,709
070	Other edible animal products	0088100-0097900	572,790
	GROUP 0—ANIMAL AND ANIMAL PRODUCTS, INEDIBLE		29,247,856
080	Hides and skins, raw (except furs)	0201000-0299900	5,860,051
090	Leather	0301400-0345900	3,213,958
100	Leather, rawhide, and parchment manufactures	0350300-0699990	5,791,332
110	Furs and manufactures	0701000-0759900	6,778,919
121	Animal and fish oils, fats, and greases, inedible	0803000-0821600	903,269
130	Other inedible animals and animal products	0840000-0990290	6,700,327
	GROUP 1—VEGETABLE FOOD PRODUCTS AND BEVERAGES		189,215,824
140	Grains and preparations	1020000-1090260	3,849,575
150	Fodders and feeds, n.e.s	1101000-1190800	1,097,352
161	Vegetables and preparations	1191100-1250900	7,191,191

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

ANNOUNCEMENTS AND SPECIAL NOTICES

STATISTICAL TREATMENT OF FOREIGN TRADE TRANSACTIONS WITH THE NEUTRAL ZONE BETWEEN KUWAIT AND SAUDI ARABIA

No provision is currently made in Schedule C "Classification of Country Designations Used in Compiling the Foreign Trade Statistics" for recording foreign trade transactions between the United States and the neutral zone which lies between Kuwait and Saudi Arabia. In the past, imports from the neutral zone have been credited to Kuwait, footnoted to indicate Kuwait as the country of shipment (rather than country of origin).

Effective immediately, pending an investigation and decision as to whether or not a new country designation should be established in Schedule C, the neutral zone between Kuwait and Saudi Arabia is being considered a part of "Arabia Peninsula States, N.E.C.", Schedule C code 519. Accordingly, imports from and exports to the neutral zone will be credited to Arabia Peninsula States, N.E.C., as country of origin and country of destination respectively.

For purposes of the vessel shipping statistics, ports determined to be within the neutral zone will be assigned to Schedule K port code 519 00 "All Other Arabia Peninsula States, N.E.S., Ports."

No interim revisions to Schedules C or K to reflect the above-described treatment of the neutral zone between Kuwait and Saudi Arabia are contemplated pending the determination as to whether or not a separate Schedule C code is desirable.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (see "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[1] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

[1] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, this information on imports will be included in the monthly issues of this report. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics,
Report FT 120, June, 1961. Washington 25, D. C.
September, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal sntry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census, United States Import Statistics, Report FT 120, July, 1961. Washington 25, D. C. September, 1961.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. and Department of Commerce Field Offices. Price 15 cents (single copy). Subscription price: $1.50; 75 cents additional for foreign mailing.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% samples of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double astersik (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see pages 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% samples of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

ANNOUNCEMENTS AND SPECIAL NOTICES

URANIUM ORE AND CONCENTRATES TO BE EXCLUDED FROM 1961 STATISTICS

During the period 1942-1960, data on imports of uranium ore and concentrates were withheld from the statistics for security reasons. During this period, however, import entries (the basic source of the import statistics) were regularly filed and forwarded to the Bureau of the Census, although these importations were not fully described on the import entry form - i.e., only the net weight in pounds was reported together with a nominal value. With the lifting of security regulations, the Bureau renewed its publication of uranium import statistics effective January 1961 on the basis of the information reported on the import entry form. The publication of this information should have been delayed until such time as true values were obtained to replace the nominal values shown on the entries.

The Bureau, with the cooperation of the U.S. Atomic Energy Commission, has now adjusted the January-July 1961 data to reflect true values and is presently preparing for publication uranium import data for the period 1942-1960. However, since the magnitude of these imports actually is much greater in proportion to total imports than was at first thought, the inclusion of these values in 1961 statistics would badly distort comparisons with 1960 data in terms of summary totals such as economic class, country, and possibly even over-all monthly totals. Monthly data for 1960 uranium imports are still not available, so comparability cannot be achieved by amending 1960 totals. Therefore, it has been decided that the data should not be added into the import totals until such time as it is possible to release at the same time comparable data for the corresponding period of the previous year. Data on imports of uranium for the months of August through December 1961 will therefore be released only in the form of a "Special Notice" which will be attached to regular tabulations and also included in the introductory pages of regular publications. Figures for these commodities will not be added into the regular import statistics or included in the announced import totals.

Imports of uranium ore and concentrates for the month of August 1961 on a correct-value basis are included in this "Special Notice." Also included in this notice are corrected data for the first seven months of 1961. As with the data for August-December 1961, the corrected data for January-July will not be carried into the regular tabulations until such time as comparable data are available for a corresponding period.

Imports of uranium ore and concentrates reported under Schedule A number 6270 700 (which is included in the subgroup 630, "Ferro-alloys, ores and metals, n.e.s.") will again be reported in the regular import statistics effective with January 1962. To avoid the possibility that the inclusion of these data for the first time in the regular statistics will be misleading when comparisons with the previous year are made, the 1961 totals will be corrected at that time by special errata to include the 1961 imports, thus providing comparable data for comparison with 1962 figures. In addition to the special errata for the months of 1961, a "Special Notice" covering imports for a number of years prior to 1961 will also be included with January 1962 publications.

While this new policy of excluding uranium imports from the statistical totals during 1961 is not consistent with the policy for export statistics where exports of all nuclear material, including uranium, are added to the statistics during 1961 it is not believed that this inconsistency will be the source of major difficulties in making export-import comparisons for economic analysis. Exports of these materials have been insignificant in dollar volume in proportion to the size of the totals normally involved in analytical reviews of foreign trade data.

The following represents corrected data for importations of uranium ore and concentrates (Schedule A No. 6270 700, which is a part of subgroup code 630) during January-July 1961. These data will not be corrected in the regular import statistics until January 1962:

Month (1961)	Country of origin		Value (dollars)
January	Canada		19,139,396
	Portugal		314,963
	Un. S. Africa		10,145,235
		Total	29,599,594
February	Canada		17,517,075
	Portugal		621,234
	Un. S. Africa		8,787,094
		Total	26,925,403
March	Canada		21,143,986
	Portugal		311,921
	Un. S. Africa		8,922,345
		Total	30,378,252
April	Canada		16,944,154
	Australia		1,393,432
	Un. S. Africa		2,254,452
		Total	20,592,038

Month (1961)	Country of origin		Value (dollars)
May	Canada		18,644,957
	Portugal		333,245
	Un. S. Africa		11,076,531
		Total	30,054,733
June	Canada		13,483,876
	Portugal		342,744
	Un. S. Africa		2,192,516
		Total	16,019,136
July	Canada		12,464,130
	Portugal		310,602
	Australia		766,750
	Un. S. Africa		7,816,989
		Total	21,358,471

The following represents imports of uranium ore and concentrates (Schedule A No. 6270 700, which is a part of subgroup 630) during August 1961. These data are not included in totals shown in this report for subgroup 630.

Country of origin		Value (dollars)
Canada		13,047,241
Portugal		305,113
Un. S. Africa		4,490,225
	Total	17,842,579

It should be noted that the foregoing corrected figures shown for January through July now include all revisions found to be necessary to date. "Special Notices" will be included each month for September through December listing current data and the 1961 calendar year table will include all additional revisions, if any, found to be necessary.

USCOMM-DC

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORT ENTRIES FOR LOW-VALUED SHIPMENTS WITH ILLEGIBLE COUNTRY INFORMATION INCLUDED IN STATISTICS AS "UNIDENTIFIED COUNTRIES"

Effective with the September 1961 statistics, the country designation "Unidentified Countries" (arbitrary country code 998 in import tabulations) is being used to reflect statistics for countries which could not be identified because of illegible reporting on import entries for low-valued shipments. The estimated values for illegible low valued entries are excluded from the individual country and country by subgroup totals shown in this report but are shown under Unidentified Countries at the end of this report as subgroup code 990.

SEPTEMBER IMPORTS OF URANIUM ORE AND CONCENTRATES (EXCLUDED FROM 1961 STATISTICS)

It was announced in the "Special Notice" dated October 11, 1961 (released with the August 1961 statistics) that imports of uranium ore and concentrates (Schedule A number 6270 700) would be excluded from the statistics for the months August-December 1961 and entered by errata in 1962. See the August "Special Notice" for a complete explanation. The following represents the data (imports for consumption and general imports) for Schedule A number 6270 700 (which is a part of subgroup code 630) which are excluded from the totals shown in this report for September 1961:

Month (1961)	Country of origin	Value (dollars)
September	Canada	13,847,549
	Portugal	327,169
	Australia	322,063
	Un. S. Africa	8,752,906
	Total	23,249,687

NEW SCHEDULE A CLASSIFICATIONS

The following Schedule A commodity classifications were established with September 1961 statistics to reflect imports under the USIDA reporting numbers announced in Circular Letter No. 281 (dated September 5, 1961):

Schedule A No. and Unit of Quantity		Subgroup code	Schedule A Commodity Description
0023 850	Lb.	020	Horsemeat, fresh chilled, or frozen (except horsemeat packed in immediate containers weighing with their contents less than 10 pounds each) (from 0023 900 and 9850 950).
9180 300	--	860	Apparatus utilizing any radioactive substance in medical diagnosis or therapeutic treatment, including the radioactive material itself when contained in the apparatus as an integral element of the apparatus, and electron microscopes, and parts or accessories of any of the foregoing, imported for its own use and not for sale by, or on behalf of, any nonprofit society, institution, or organization, whether public or private, incorporated or established for educational, scientific, or therapeutic purposes. (Not previously provided for in Schedule A.)
9670 400	--	920	Other works of art, except sculptures, statuary, and copies thereof, n.s.p.f. (T.D. 54854). (Not previously provided for in Schedule A.)

An announcement of the foregoing will be issued in a regular Public Bulletin.

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see pege 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the doubls asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

[1]Countries which could not be identified because of illegible reporting on import entries for low-value shipments.

ANNOUNCEMENTS AND SPECIAL NOTICES

CENSUS BUREAU TO PUBLISH FOREIGN TRADE AIR CARGO STATISTICS

The Bureau of the Census, United States Department of Commerce, has completed preparations to compile and publish monthly and annual statistics on United States foreign trade shipments by air. The foreign trade air cargo statistics program is being instituted effective with the statistics for January 1962. Funds were provided by the last session of Congress, enabling the Census Bureau to resume work which was suspended in 1947 due to budgetary considerations.

The following separate monthly summary tabulations for export and import air cargo movements showing dollar value, shipping weight, and net quantity (where applicable) will be prepared and made available for reference purposes at various locations throughout the United States:

1. AM 751, United States Exports of Domestic and Foreign Merchandise by Air - Commodity (Schedule B) by Country of Destination by Customs District of Exportation.

2. AM 752, United States Exports of Domestic and Foreign Merchandise by Air - Customs District of Exportation by Country of Destination by Commodity (Schedule B).

3. AM 351, United States General Imports of Merchandise by Air - Commodity (Schedule A) by Country of Origin by Customs District of Unlading.

4. AM 352, United States General Imports of Merchandise by Air - Customs District of Unlading by Country of Origin by Commodity (Schedule A).

Copies of each of the above tabulations will be made available for reference purposes at the following locations:

Foreign Trade Division
Bureau of the Census
Room 2236, Federal Office Building 3
Washington 25, D. C.
(Located in Suitland, Maryland)

New York Office
Economic Operations Division
Bureau of the Census
Room 434 Customhouse
New York 4, New York
(Located at Bowling Green)

Department of Commerce Field Office
Room 419 Customhouse
555 Battery Street
San Francisco 11, California

Department of Commerce Field Office
1508 Masonic Temple Building
333 St. Charles Avenue
New Orleans 12, Louisiana

Department of Commerce Field Office
408 Ainsley Building
14 N. E. First Avenue
Miami 32, Florida

Sections of AM 352 and AM 752 covering individual Customs districts will also be available for reference purposes at the offices of Collectors of Customs or Department of Commerce field offices located in principal cities.

In addition, the following printed publications will be released on a monthly and annual basis and will be available at a nominal cost:

1. Report No. FT 780, United States Exports of Domestic and Foreign Merchandise by Air - Commodity (Schedule X) by Country of Destination.

2. Report No. FT 790, United States Exports of Domestic and Foreign Merchandise by Air - Country of Destination by Commodity (Schedule X).

3. Report No. FT 380, United States General Imports of Merchandise by Air - Commodity (Schedule Y) by Country of Origin.

4. Report No. FT 390, United States General Imports of Merchandise by Air - Country of Origin by Commodity (Schedule Y).

The cost of the subscriptions to the above printed reports will be announced in the near future.

LEVEL OF ACCURACY IN IMPORT STATISTICS

In a later issue of this report, announcement will be made with regard to a new procedure to become effective January 1, 1962, which it is believed will result in the correction of the bulk of importers' and brokers' errors in reporting statistical information before their reports are included in the import statistics. Work by the Bureau of Customs, the Tariff Commission, and the Bureau of the Census is now going forward to permit effective prior verification without delaying the inclusion of the corrections in statistics.

In the meantime, additional more specific information has become available on the degree of inaccuracy in the import statistics for past periods under existing collecting and reporting procedures. This article is for the purpose of passing this new information on to users of the statistics and to describe the results of earlier efforts to improve statistical accuracy.

Prior to 1960, importers, brokers and Customs officials reported imports in terms of two commodity classification systems, the United States Import Duties (USID) for duty determinations, and Schedule A for statistical purposes. The difficulties in reporting with two completely different classification outlines were described in Foreign Trade Statistics Notes of May-September 1958. To surmount these difficulties a new reporting manual, United States Import Duties Annotated for Statistical Reporting (USIDA), was instituted January 1, 1960, merging the two classification systems.

As indicated in the October-December 1959 Foreign Trade Statistics Notes, it was expected that the use of the new USIDA reporting manual would improve the accuracy of reporting on the import entries. It was believed that the new manual which combined the statistical and tariff requirements in one volume in tariff paragraph order would make reporting simpler for importers and brokers. It was also hoped that the new manual would make the work of Customs entry officers easier in the preliminary check which they make

of import entries against invoices and other documents. (The Customs entry officers are able to detect and correct some errors which appear in the documents as originally filed, and their corrections are reflected in the statistics.)

While the reporting manual did fill an important need in merging the tariff and statistical classification systems, thereby providing a more convenient tool for encouraging better initial reporting, recent studies show that the improvement in accuracy in the statistics has not met expectations. This stems from the fact that the statistics under present collecting procedures are compiled on an "as entered" basis and do not reflect corrections resulting from a physical examination of the merchandise and invoices by Customs examiners for duty determination purposes. The statistics are compiled on the basis of entries forwarded to the Bureau of the Census as soon as the duties estimated by the importer or Customs broker have been deposited or the duty-free status of the merchandise has been tentatively accepted by Customs pending formal appraisement and liquidation. Although the Customs entry officer has access to the invoices at the time the import entries are received and can check for consistency between descriptions on invoices and those on the entries, he cannot be expected to anticipate changes in classifications and other factors that may be made by the Customs examiner at the time of his visual inspection of the merchandise. This examination now takes place after the statistical copies of the import entries are forwarded to Census.

To ascertain the effects of changes by Customs Examiners on import entries upon the individual commodity classification totals, a study was undertaken jointly by the Bureau of Customs, Tariff Commission, and the Bureau of the Census for the entire flow of imports into the port of Philadelphia during January 1961. This study showed that Examiner changes of all kinds in the importers' or brokers' reporting were made on 25 percent of the import items and changes in classification were made on 14 percent. On the other hand, Census coders who independently verified copies of these same entries, changed less than one-third of the number changed by Customs Examiners. Since most commodity totals are based on very small numbers of items (fewer than 10), these error rates may produce substantial percentage errors in the totals. Only 5,415 items were included in the 1,194 commodity classifications assigned by the Examiners or by Census coders for Philadelphia in January. Value totals for 546 (46 percent) of the 1,194 commodity classifications differed due to differences in classification or value for individual items; 411 differed by more than 10 percent. For 139 (12 percent) of the 1,194 classes, there were differences in value totals not associated with differences in commodity classification, and for 126 (11 percent) there were differences in quantity that did not involve classification differences. These differences included a small number of inadvertent errors on the part of the Examiners in checking the statistical information.

While the entries filed at the port of Philadelphia for a single month represent a small sample of the entries filed at all ports, the results of the Philadelphia study are consistent with the findings in other studies, indicating that numerous changes are made by Examiners that ought to be reflected in the statistics if the data are to approach a desired level of accuracy. For example, changes were made by Philadelphia Examiners on 30 percent of the January 1961 import entries (not items) as compared with changes made on 24 percent of the August 1960 import entries as disclosed on a tally made by the Bureau of Customs for that month at 15 ports. In that study the percentage of entries changed ranged from a low of about 7 percent at one port to a high of about 37 percent at another port. Similarly, another study by the Bureau of the Census covering 5 percent of the entries at the Port of New York in June 1960 showed that 23 percent of the items (not entries) included were changed significantly by Customs Examiner. These and other studies show clearly the urgent need for additional action to improve the accuracy of the import statistics, and it is believed that the new procedures to be introduced in January 1962 will accomplish substantial improvement.

OCTOBER IMPORTS OF URANIUM ORE AND CONCENTRATES (EXCLUDED FROM 1961 STATISTICS)

It was announced in the August 1961 issue of this report that imports of uranium ore and concentrates (Schedule A number 6270 700) would be excluded from the statistics for the months August-December 1961 and entered by errata in 1962. See the August "Special Notice" for a complete explanation. The following represents the data (imports for consumption and general imports) for Schedule A number 6270 700 (which is part of subgroup 630) which are excluded from the totals shown in this report for October 1961:

Month (1961)	Country of origin	Value (dollars)
October	Canada	12,652,906
	Portugal	403,389
	Un. S. Africa	11,187,264
	Total	24,243,559

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320

80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

ANNOUNCEMENTS AND SPECIAL NOTICES

NOVEMBER IMPORTS OF URANIUM ORE AND CONCENTRATES (EXCLUDED FROM 1961 STATISTICS)

It was announced in the "Special Notice" dated October 11, 1961 (released with the August 1961 statistics) that imports of uranium ore and concentrates (Schedule A number 6270 700) would be excluded from the statistics for the months August-December 1961 and entered by errata in 1962. See the August "Special Notice" for a complete explanation. The following represents the data (imports for consumption and general imports) for Schedule A number 6270 700 (which is part of subgroup code 630) which are excluded from the totals shown in this report for November 1961:

Country of origin	Value (dollars)
Canada	14,607,686
Portugal	405,537
Australia	580,395
Un. S. Africa	6,711,500
Total	22,305,118

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

ANNOUNCEMENTS AND SPECIAL NOTICES

DECEMBER IMPORTS OF URANIUM ORE AND CONCENTRATES (EXCLUDED FROM 1961 STATISTICS)

It was announced in the "Special Notice" dated October 11, 1961 (released with the August 1961 statistics) that imports of uranium ore and concentrates (Schedule A number 6270 700) would be excluded from the statistics for the months August-December 1961 and entered by errata in 1962. See the August "Special Notice" for a complete explanation. The following represents the data (imports for consumption and general imports) for Schedule A number 6270 700 (which is a part of subgroup 630) which are excluded from the totals shown in this report for December 1961:

Month (1961)	Country of origin	Net quantity (pounds)	Value (dollars)
December	Canada	1,298,075	11,253,071
	Portugal	271,842	362,587
	Australia	39,748	352,869
	Un. S. Africa	435,242	4,521,401
	Total	2,044,907	16,489,928

GENERAL EXPLANATION

COVERAGE

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

The geographic definition of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The ommission of a country name from this report indicates no imports from that country.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented for each country in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included.

To save printing cost, complete country by subgroup information is not shown in this report. For each country, separate information is shown only for those subgroups whose individual totals for that country during the period covered by the report were $10,000 or more. Imports from each country of commodities falling in subgroups with individual totals of less than $10,000 for that country are presented as a combined total for each commodity group. Individual subgroup information for imports reported in these combined totals will be supplied upon request. A charge may be made to cover the cost of preparing this detailed information. The omission of a numbered subgroup under any country indicates no imports from that country, or imports less than $10,000.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.) Effective January 1961, special announcements of interest to users of Report FT 120 will be included in this report; other announcements on imports will be included in Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the overall and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 99 (990 effective January 1960), includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries were estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures;" "Fodders and feeds, n.e.s.;" "Scientific and professional instruments, apparatus, and supplies, n.e.s.;" and "Books, maps, pictures, and other printed matter, n.e.s.;" all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.
   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   As in the past, country by subgroup items of less than $10,000 are combined on a commodity group basis. They are shown as "Subgroups valued under $10,000." However, in order that users may always be informed of the estimated amount for low valued imports for a particular country, arbitrary subgroup 990 is always shown separately even if its value is less than $10,000. Therefore, if no item labeled subgroup 990 appears for a country, the user will know that no formal entry imports of $99 or less or informal imports from that country appeared in the sample and no estimate of low valued shipments is included in the country total.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

The imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)
2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)
3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"
4. Individual country codes as shown in Schedule C
5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States)

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from a complete tabulation is not expected. The extent to which estimated country codes in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 990 based upon 75 shipments in the sample would be between $15,885,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using January 1958 and subsequent months' figures for purposes of comparison with figures for periods prior to January 1958, account must be taken of the coverage which was in effect for the earlier months, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 990. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior months. The country by subgroup and country by group figures, except group 9, for January 1954-December 1957 are comparable to months prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period. During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by [1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560

14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2]400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Subgroup code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)
	IMPORTS FOR CONSUMPTION		1,256,229,146

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

[1]Countries which could not be identified because of illegible reporting on import entries for low-value shipments.

ACKNOWLEDGEMENTS

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

REPORT FT 110-UNITED STATES IMPORTS OF MERCHANDISE FOR CONSUMPTION
Commodity by Country of Origin

OCTOBER 1961

LEVEL OF ACCURACY IN IMPORT STATISTICS

In a later issue of this report, announcement will be made with regard to a new procedure to become effective January 1, 1962, which it is believed will result in the correction of the bulk of importers' and brokers' errors in reporting statistical information before their reports are included in the import statistics. Work by the Bureau of Customs, the Tariff Commission, and the Bureau of the Census is now going forward to permit effective prior verification without delaying the inclusion of the corrections in statistics.

In the meantime, additional more specific information has become available on the degree of inaccuracy in the import statistics for past periods under existing collecting and reporting procedures. This article is for the purpose of passing this new information on to users of the statistics and to describe the results of earlier efforts to improve statistical accuracy.

Prior to 1960, importers, brokers and Customs officials reported imports in terms of two commodity classification systems, the United States Import Duties (USID) for duty determinations, and Schedule A for statistical purposes. The difficulties in reporting with two completely different classification outlines were described in Foreign Trade Statistics Notes of May-September 1958. To surmount these difficulties a new reporting manual, United States Import Duties Annotated for Statistical Reporting (USIDA), was instituted January 1, 1960, merging the two classification systems.

As indicated in the October-December 1959 Foreign Trade Statistcs Notes, it was expected that the use of the new USIDA reporting manual would improve the accuracy of reporting on the import entries. It was believed that the new manual which combined the statistical and tariff requirements in one volume in tariff paragraph order would make reporting simpler for importers and brokers. It was also hoped that the new manual would make the work of Customs entry officers easier in the preliminary check which they make of import entries against invoices and other documents. (The Customs entry officers are able to detect and correct some errors which appear in the documents as originally filed, and their corrections are reflected in the statistics.)

While the reporting manual did fill an important need in merging the tariff and statistical classification systems, thereby providing a more convenient tool for encouraging better initial reporting, recent studies show that the improvement in accuracy in the statistics has not met expectations. This stems from the fact that the statistics under present collecting procedures are compiled on an "as entered" basis and do not reflect corrections resulting from a physical examination of the merchandise and invoices by Customs examiners for duty determination purposes. The statistics are compiled on the basis of entries forwarded to the Bureau of the Census as soon as the duties estimated by the importer or Customs broker have been deposited or the duty-free status of the merchandise has been tentatively accepted by Customs pending formal appraisement and liquidation. Although the Customs entry officer has access to the invoices at the time the import entries are received and can check for consistency between descriptions on invoices and those on the entries, he cannot be expected to anticipate changes in classifications and other factors that may be made by the Customs examiner at the time of his visual inspection of the merchandise. This examination now takes place after the statistical copies of the import entries are forwarded to Census.

To ascertain the effects of changes by Customs Examiners on import entries upon the individual commodity classification totals, a study was undertaken jointly by the Bureau of Customs, Tariff Commission, and the Bureau of the Census for the entire flow of imports into the port of Philadelphia during January 1961. This study showed that Examiner changes of all kinds in the importers' or brokers' reporting were made on 25 percent of the import items and changes in classification were made on 14 percent. On the other hand, Census coders who independently verified copies of these same entries, changed less than one-third of the number changed by Customs Examiners. Since most commodity totals are based on very small numbers of items (fewer than 10), these error rates may produce substantial percentage errors in the totals. Only 5,415 items were included in the 1,194 commodity classifications assigned by the Examiners or by Census coders for Philadelphia in January. Value totals for 546 (46 percent) of the 1,194 commodity classifications differed due to differences in classification or value for individual items; 411 differed by more than 10 percent. For 139 (12 percent) of the 1,194 classes, there were differences in value totals not associated with differences in commodity classification, and for 126 (11 percent) there were differences in quantity that did not involve classification differences. These differences included a small number of inadvertent errors on the part of the Examiners in checking the statistical information.

While the entries filed at the port of Philadelphia for a single month represent a small sample of the entries filed at all ports, the results of the Philadelphia study are consistent with the findings in other studies, indicating that numerous changes are made by Examiners that ought to be reflected in the statistics if the data are to approach a desired level of accuracy. For example, changes were made by Philadelphia Examiners on 30 percent of the January 1961 import entries (not items) as compared with changes made on 24 percent of the August 1960 import entries as disclosed on a tally made by the Bureau of Customs for that month at 15 ports. In that study the percentage of entries changed ranged from a low of about 7 percent at one port to a high of about 37 percent at another port. Similarly, another study by the Bureau of the Census covering 5 percent of the entries at the port of New York in June 1960 showed that 23 percent of the items (not entries) included were changed significantly by Customs Examiners. These and other studies show clearly the urgent need for additional action to improve the accuracy of the import statistics, and it is believed that the new procedures to be introduced in January 1962 will accomplish substantial improvement.

Imports of Uranium Ore and Concentrates (Excluded from Import Statistics) 1942 through 1960

It was announced in the January and August 1961 issues of this report that data on imports of uranium, thorium, and related commodities which were previously withheld for security reasons would be released. With the exception of the attached data covering imports of uranium ore and concentrates (Schedule A number 6270 700 which is a part of subgroup 630) these figures will be released later in 1962.

The following table represents imports of uranium ore and concentrates entered under Schedule A number 6270 700 during the calendar years 1942[1] through 1960. These figures are those furnished by the Atomic Energy Commission since the records on file in the Bureau of the Census are incomplete for that period.[2] It should be noted that the available country information is limited to Canada, Union of South Africa, and all other as "Unidentified countries"; values shown are in terms of thousands of dollars.

[1]The figures shown for 1942 supersede those previously published in Foreign Commerce and Navigation.

[2]See the explanation in the August 1961 issue of FT 110.

Corrected Monthly Data on Imports of Uranium Ores and Concentrates (Schedule A Commodity Number 6270 700) January-December 1961

In addition to the annual data on exports of uranium ore and concentrates (Schedule A number 6270 700 which is a part of subgroup 630) for the years 1942-1960, shown in the preceding notice, corrected monthly data on exports of uranium ores and concentrates during 1961 are also being shown in this annual report (below). Monthly data on exports of uranium ores and concentrates were excluded from the regularly compiled statistics during 1961 and were shown as "special notices" in the front of the regular monthly import publications (FT 110, and FT 120). The following figures for January-December 1961 include all revisions found to be necessary to date.

Effective January 1962, data on exports of uranium ores and concentrates, Schedule A commodity number 6270 700, will be included in the regularly compiled monthly reports. Monthly totals for 1961 will be corrected to include data on exports of uranium ores and concentrates by an errata which will be shown in the March 1962 issue of Report FT-110.

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for in-transit shipments), but there are some exclusions of items of relatively small importance in terms of total value such as gifts valued at less than $100.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouse), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly and Annual Coverage

In general, the compiling procedures provide for the inclusion of shipments in the statistics for the month of import. However, because of processing problems, there has always been a carry-over of a few percent of shipments from their proper month to a subsequent month, usually the following month. Normally, the amount of carry-over from month to month (and from year to year) remains substantially constant. In March 1958, the amount of carry-over was increased in order to take full advantage of early release dates made possible with the use of electronic equipment for processing import data.

For individual countries and commodity subgroups, the carry-over procedure as a whole may result in the inclusion in the 1961 statistics of some shipments made in 1960 and/or the exclusion from the 1961 statistics of some 1961 shipments which will appear in the 1962 statistics.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for in-transit shipments), i.e., merchandise released from Customs custody immediately upon arrival, plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse, immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of in-transit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. A more complete description of the coverage and presentation of these separate shipping statistics will be found in the introduction to that report.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry (various Customs forms), which importers are required to file with Collectors of Customs for each shipment arriving in the United States. Importers are instructed to report value and country of origin information in accordance with the definitions given below.

VALUATION

The dollar value which should be shown in the import statistics is defined generally as the market value in the foreign country and should exclude the United States import duties, ocean freight and marine insurance. In actual practice only the values reported for imports subject to an ad valorem rate of duty (a percentage of the value) will tend to conform precisely to the valuation definition. Imports subject to an ad valorem rate of duty account for only 10-15 percent of the total value of imports. For merchandise not subject to an ad valorem rate of duty (85-90 percent of imports), the reported values may not be in accordance with the above definition. For example, ocean freight may be inadvertently included in the values, values for shipments between allied firms may reflect arbitrary values, etc.

COUNTRY OF ORIGIN

Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading or the country in which mixed lots of various origin are consolidated. This is particularly true of goods received from merchanting or transshipment countries such as Hong Kong, Singapore, Netherlands, Belgium, etc.; in such cases the statistics may credit the shipments to such countries rather than the country of origin as defined. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated. Where it is known that a country is not the country of origin, the country of shipment is shown and footnoted in this report.

Effective with the September 1961 statistics, the country designation "Unidentified Countries" (arbitrary country code 998 in import tabulations) is being used to reflect statistics for countries which could not be identified because of illegible reporting on import entries for low-valued shipments. The estimated values for illegible low valued entries are excluded from the individual country and country by subgroup totals shown in this report but are shown under Unidentified Countries at the end of this report as subgroup code 990.

The geographic definition of countries (except "Unidentified Countries") reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Schedule C shows the descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of each country for statistical purposes. It is published as a part of Schedule A (see "Commodity Subgroup Information," below). A separate edition is also available free upon request to the Bureau of the Census. In this report countries are listed according to continents, in sequence within each continent from north to south and west to east, in accordance with their arrangement in Schedule C. The Table of Contents on page 7, which lists the countries in this order, will assist in locating the data for individual countries. The omission of a country name from this report indicates no imports from that country valued at more than $100 reported on formal entries.

Effective June 1961, imports from the neutral zone between Kuwait and Saudi Arabia are credited to Arabia Peninsula States, n.e.c. Prior to that date imports from the neutral zone were credited to Kuwait. No interim revision was made in Schedule C to reflect this change.

COMMODITY SUBGROUP INFORMATION

For presentation in this report, the commodity information compiled in terms of the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States, is summarized into approximately a hundred subgroups of related commodities. It is presented in the order in which the subgroup classifications are numbered in Schedule A. Reference to the table on page 8 will show the subgroup numbers, their unabbreviated descriptions, and the

range of numbers of the individual Schedule A classifications included in each. For precise information as to the commodity content of individual subgroups, reference should be made to the descriptions in Schedule A of the numbered classifications included. (See page i for a more complete discussion of the over-all accuracy of the import statistics in the reprint of an article which appeared in the October 1961 issue of this report.)

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the lastest edition of Foreign Commerce and Navigation of the United States. (Copies are available for reference at public libraries.) Prior to September 1960, regular subscribers to FT reports were automatically supplied with copies of Foreign Trade Statistics Notes, a monthly publication containing information of value to users of foreign trade statistics (such as, changes in type of shipments covered by current statistics, unusual shipments, problems of valuation, classification, etc.). Effective January 1961, special announcements of interest to users of Report FT 120 will be included in the monthly issues of this report; other announcements on imports will be included in the monthly issues of Report FT 110. A catalog of United States Foreign Trade Statistical Publications is also available. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost for a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

EXPLANATION OF THE SAMPLING PROCEDURE FOR ESTIMATING LOW VALUED IMPORTS, 1961

A. CHANGE IN EXTENT OF SAMPLING

Beginning January 1958, the United States imports statistics include, on a fully compiled basis, all imports individually valued at $100 or more reported on formal entries, and, on a one percent sample basis, all imports individually valued at less than $100 reported on formal entries as well as all imports reported on informal entries. (Informal entries, by definition, contain only items valued not more than $250.)

For the period January 1954-December 1957, imports individually valued $250 or less whether reported on formal immediate consumption or informal entries were excluded from the detailed commodity statistics but included in the over-all and summary totals on the basis of a five percent sample.

The September 1957 and January-March 1958 issues of the Foreign Trade Statistics Notes contain articles explaining the basis for the change in the sampling procedure.

B. SUMMARY OF EFFECTS ON REPORT NO. FT 120 OF THE CHANGES IN COVERAGE AND THE ESTIMATING PROCEDURE

As a result of the changes described above, the data in Report No. FT 120 effective January 1958 are affected as follows:

1. The subgroup summary table shown on page 8.
   (a) The coverage of the subgroup figures has been decreased. Effective January 1958 the total value shown for each subgroup, except arbitrary subgroup 990, includes the fully compiled total for formal entry imports valued $100 or more. However, they exclude estimates, if any, of the imports valued under $100 on formal entries and $250 or less on informal consumption entries which are estimated on a one percent sample basis and shown under subgroup 990. Prior to January 1958 the value for shipments valued $250 or less whether reported on formal or informal entries was estimated and included in the appropriate commodity group and subgroup totals.

   (b) The change in sampling procedure and presentation of the estimated value for low-value shipments effective January 1958 will therefore result in understating the value of commodity group totals for other than group 9. However, the understating will probably affect the group totals by no more than about two percent. The arbitrary inclusion of the estimated value for low-value shipments in group 9 results in overstating the value of imports for that group by about 10-15 percent. The extent of the undercounting in the value of the commodity subgroup totals as a result of the exclusion of the estimated low-value shipments is no more than about five percent except for subgroups covering, "Leather, rawhide and parchment manufactures"; "Fodders and feeds, n.e.s."; "Scientific and professional instruments, apparatus, and supplies, n.e.c."; and "Books, maps, pictures, and other printed matter, n.e.s."; all of which may be understated by about 10 to 15 percent.

   (c) Beginning January 1960, subgroup data are presented in terms of 3-digit subgroup classifications. The 3-digit subgroup numbers, replacing the 2-digit code numbers in effect during earlier periods, were established to provide for an increase in subgroup designations effective January 1960. An exact analysis of the probable undercounting of the ten new 3-digit subgroups, which replace four 2-digit subgroups, has not been made. However, the extent of undercounting in the value of the new subgroup totals as a result of exclusion of the estimated low-value shipments is probably no more than five percent.

2. The country, country by commodity subgroup, and country by commodity group figures in the main part of this report.

   (a) Country totals. The coverage of the country totals shown in this report are not affected by this change in sampling procedure. Prior to 1958 imports valued $250 or less whether reported on formal or informal entries were estimated and presented under subgroup 94 for each country. Effective January 1958, imports reported on informal entries and imports valued under $100 reported on formal entries are estimated and presented under subgroup 990. Imports valued $100 to $250 reported on formal entries are fully compiled and distributed by subgroup within each country.

   (b) Country by subgroup totals. As stated above, the coverage of the country by individual subgroup figures has been broadened to include data on formal entry imports valued $100-$250. Prior to 1958 data on these shipments were included as a part of the low-value estimates presented under subgroup 94. Effective January 1958 imports valued under $100 on formal entries and $250 or less on informal entries, formerly also a part of subgroup 94, are shown under arbitrary subgroup 990. For subgroup 990, the number of shipments in the sample upon which the estimate was based is shown at the right of the subgroup description. In order that the estimated data and the sample information may be readily identified, a double asterisk (**) appears at the right of the figure for the number in the sample, immediately preceding the estimated value figure for subgroup 990.

   (c) Country by group totals. The country by group totals, other than for group 9, do not include any information on formal entry imports valued under $100 or informal entry imports valued $250 or less. Coverage has been increased by the inclusion of formal entry imports valued $100 to $250 which were excluded prior to 1958. The total for group 9 for the country includes the entire amount of the estimate of low value imports for the country. This inclusion in group 9 is purely arbitrary since the estimate covers all commodity groups for the country.

C. THE ESTIMATING PROCEDURE

For imports individually valued under $100 reported on formal immediate consumption entries and for imports reported on informal entries, a one percent sample of import entries is taken. Data are compiled from the sample and multiplied by 100 to obtain the estimates included in the statistics. These estimates are summarized and included in the statistics under:

1. Arbitrary Schedule A commodity number 9999 500 (not shown in this report but published in FT 110)

2. Arbitrary Customs District code 99 as "Estimated value $1-$99 formal and $1-$250 informal entry shipments" (not shown in this report but published in FT 970-I)

3. Arbitrary commodity subgroup code 990 as "LOW VALUE DOLLAR EST"

4. Individual country codes as shown in Schedule C

5. The economic class for "finished manufactures" (not shown in this report but published in FT 930-I and the Quarterly Summary of Foreign Commerce of the United States).

D. ACCURACY OF THE SAMPLE ESTIMATES

When statistics are estimated on the basis of a sample, exact agreement with the results that would have been obtained from

a complete tabulation is not expected. The extent to which estimated country totals in this report for the low valued imports (shipments of under $100 in value reported on formal entries and imports valued at less than $250 reported on informal entries) might not agree with a complete tabulation depends on the number of documents which fall in the sample. For each estimated figure in the report the number of documents in the sample on which the estimate was based is given.

As an example of the use of the table below, suppose an estimated value of $310,800 is based on 45 documents in the sample. Referring to the line "40-49," one notes the values $79,800 and $99,000. This means that the chances are better than 2 out of 3 that a complete tabulation would have resulted in a figure between $231,000 ($310,800 reduced by $79,800) and $409,800 ($310,800 increased by $99,000). Similarly, a country total of $15,957,189 which represents a total of $15,881,519 for the fully compiled data plus an estimate of $75,670 for subgroup 99 based upon 75 shipments in the sample would be between $15,855,189 ($15,957,189 reduced by $102,000) and $16,097,189 ($15,957,189 increased by $120,000).

In the event a user desires to combine 2 or more figures which are estimated values, or which include estimated values, the variability of the combined total can be determined by merely adding the sample size for each estimated value and then referring to the line on the reliability table applicable to the combined sample size.

The omission of an estimate of the low valued shipments for any country indicates that there were no low valued import shipments appearing in the 1 percent document sample for the country. This does not necessarily mean that low valued imports were not made.

E. EFFECT OF CHANGE IN COVERAGE ON COMPARABILITY WITH DATA FOR PERIODS PRIOR TO JANUARY 1958

When using figures for 1958 and later periods for purposes of comparison with figures for periods prior to 1958, account must be taken of the coverage which was in effect for earlier periods, as well as the coverage effective January 1958. Coverage statements and explanations of any sampling procedure used are included in the issues of Report No. FT 120. Beginning January 1958, the estimated values for informal entry shipments and for under $100 formal entry shipments are summarized and included under arbitrary commodity subgroup code 99. During 1954-1957 estimated values for shipments valued $250 or less whether reported on formal or informal entries were included in the appropriate commodity group and subgroup totals. Since no information on imports covered by informal entries was included in any of the figures prior to January 1954, the country totals and subgroup totals (in the subgroup summary tables) for January 1954 - December 1957 which include information on informal entries are not comparable in this respect to prior periods. The country by subgroup and country by group figures, except group 9, for January 1954 - December 1957 are comparable to periods prior to January 1954 in the handling of information on informal entries, since no information is included in the figures during either period.

During the period July-December 1953, information on formal entries valued under $100 was excluded from the country by subgroup and country by group totals, and this would affect the comparability of the figures with those for other periods.

The table below indicates the degree of reliability to be attached to a specified value.

If the number of documents indicated from the sample is:	Then the chances are better than 2 out of 3 that a complete tabulation would have resulted in a value figure between	
	The specified estimate reduced by[1]	And the specified estimate increased by
0	0	21,840
1	9,840	27,240
2	15,360	31,320
3	19,440	34,560
4	22,800	37,560
5	25,680	40,080
6	28,320	42,480
7	30,720	44,760
8	32,880	46,800
9	35,040	48,720
10	36,960	50,640
11	38,760	52,440
12	40,560	54,120
13	42,360	55,680
14	43,920	57,240
15	45,480	58,800
16	47,040	60,240
17	48,480	61,680
18	49,920	63,120
19	51,360	64,440
20-24	55,200	68,400
25-29	60,000	75,000
30-34	66,000	84,000
35-39	72,000	90,000
40-49	79,800	99,000
50-59	87,600	108,000
60-69	96,000	116,400
70-79	102,000	120,000
80-89	108,000	121,200
90-99	113,640	125,520
100-124	127,680	139,560
125-149	140,400	152,280
150-174	152,160	164,040
175-199	162,960	174,960
200-249	183,000	194,760
250-299	200,880	212,880
300-399	232,920	244,800
[2] 400-499	261,120	273,000

[1] The minimum value of a complete tabulation for imports (both formal entries of individual items valued $1 to $100 and informal entries valued $1 to $250) must be greater than 1/100 of the estimated amount shown in the report.

[2] If the number of documents in the sample is greater than 499, the sampling variability for the estimates of the low valued shipments will generally be less than 7 percent.

IMPORTS OF MERCHANDISE FOR CONSUMPTION, BY SUBGROUP

(The commodity group and subgroup figures shown in this table may not be comparable with figures for periods prior to 1960 because of certain revisions in coverage and for periods prior to 1958 because of certain changes in sampling procedures and presentation of low value shipments. See page 6A of the January 1960 issue of this report for information on revised coverage; see page 5 of this report for explanation of the sampling procedure.)

Sub-group code No.	Group and subgroup description	Range of Schedule A commodity code Nos.	Value (dollars)

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipmente valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipmente in sample [hown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$250 and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.

**Import data on line labeled "LOW VALUE DOLLAR EST" are estimates based on 1% sample of informal entry shipments valued $1-$25D and formal entry shipments valued $1-$99. These estimated amounts are included in the group 9 total and in the country total. For an explanation of the sampling procedure and use of number of shipments in sample [shown immediately to the left of the double asterisk (**)] to determine the reliability of the sample, see page 5.
